

TAG PICCOLINO FOR RTLS-TDOA

A TINY TAG POWERED BY COIN BATTERY

Tag Piccolino is an active mobile locator. Its position and ID is reported within configurable rate. Tracked objects need to be equipped with this device.

The Tag is powered by a coin battery and it is configurable through RTLS Manager web interface. The Tag is equipped with DecaWave UWB radio module with an omnidirectional ceramic antenna.

The Piccolino also features an accelerometer for movement detection which is prolonging the battery lifetime.
